Bank safe deposit multiple cupboard security - involves sliding row
of segments, each for several cupboards

LEICHER & CO GMBH 13.03.84-DE-409127

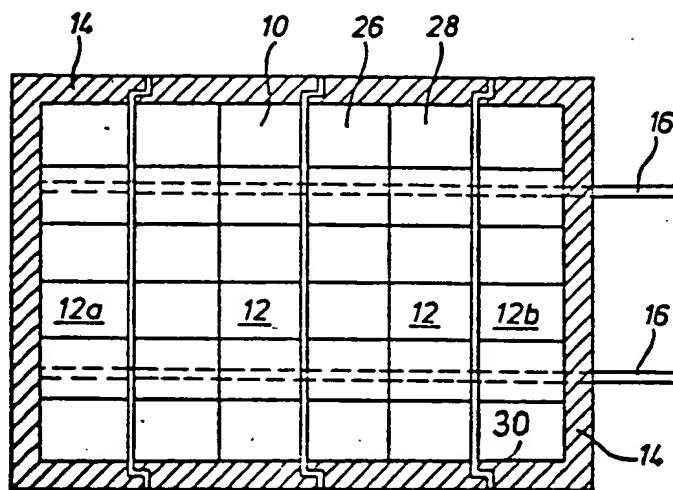

(19.09.85) E05g-01/06

13.03.84 as 409127 (568DB)

The device secures a number of separately closed cupboards, such as in a valuables deposit in banks. In each case, a number of cupboards (10) are fastened in segments (12), arranged in a row.

At least one segment is displaceably mounted, so that every segment is positionable both directly next to another, and at an interval from it. The segments may be movable on rails (16) sunk in the floor, or on rollers. They are pref. elongated and roughly rectangular, in horizontal cross-section.

ADVANTAGE - Available space is effectively used, and individual cupboards are directly accessible to customers. (11pp Dwg.No.1/5)
